

White County, Indiana

Manatron Appraisal Services Utilized Successfully

Customer Spotlight

Located in Northwest Indiana, 35 miles north of Lafayette, White County has a population of about 26,000 and contains approximately 22,000 parcels. Primarily a farming community, the County is currently developing over 150 acres of land that will contain wind turbines generating power for many residents throughout the region. This would be the largest wind farm in the country.

Manatron has been serving the White County Assessor's office in a variety of ways since 2002. That year, the County took on both a new appraisal software installation and a county-wide reassessment project, both provided by Manatron. White County continues to be a happy Manatron CAMA customer today.

"We chose Manatron because of their experience and success across the State of Indiana and the Midwest," said White County Assessor, Karen Hatter. "The selection and installation of Manatron's CAMA software solution was one of the best things we have ever done.

"Manatron has done a great job and we have had a good experience."

It is a great product and we have enjoyed having it in our office."

Since the initial county reassessment in 2002, Manatron has continued to provide Appraisal Services to the County Assessor's office. Manatron provides annual Trending and Commercial New Construction services as well as other appraisal consulting when needed.

"Manatron has done a great job and we have had a good experience with the whole company," Hatter commented. "They work with us to get through our processes and are always available when called upon and we look forward to working with them again during our 2011 reassessment."
