PORTAGE, MI — May 4, 2009 - Manatron, Inc. a global leader in providing integrated, enterprise-level property tax and records management solutions for state and local governments, announced that it has received a contract from Waukesha County, Wisconsin Register of Deeds Office for its GRM Records Management software solution – GRM Recorder – and related professional services. This will be Manatron's first GRM Recorder installation in the state of Wisconsin.

This installation of GRM Recorder includes Land Records, military discharges, plats, vitals, Automated Indexing (AI), and eRecording. The .NET architecture and design of Manatron's products also make integrating the Register of Deed's system into other third party county-wide systems possible without the need for custom development effort.

As workloads increase and many counties are challenged to do more with less, counties are looking for ways to streamline their office processes. By increasing office productivity and improving accuracy in the document management process, counties can reduce costs related to fluctuating volume and increased public demand for document accessibility. Manatron GRM Recorder offers a comprehensive, enterprise-level solution for records management and automated recording and indexing operations.

"Waukesha County's land records are currently maintained on computerized systems developed 'in house' during the 1970's and 80's," said Jim Behrend, Waukesha County Register of Deeds. "After conversion to Manatron GRM Recorder, we will no longer be dependent on our internal information system staff for the maintenance of and changes to our land records system. In the future, the Manatron package will allow us to quickly update our systems, as laws and technology impacting the land records systems change."

"In addition, we are excited to announce that GRM Recorder will allow Waukesha County to accept eRecording of land records documents, Behrend said. "eRecording of land records will eventually become the predominant form of recording these documents and we are confident that GRM Recorder will allow Waukesha County to be on the 'cutting edge' of any future changes to land record recording."

"Waukesha County was looking for an integrated solution that would allow better efficiency of their office operations, and we are excited to welcome them to the Manatron family," said Bill McKinzie, Manatron's President and Chief Executive Officer. "This initial contract win for Wisconsin will allow us to continue marketing GRM Recorder to Registers of Deeds in the State. We look forward to our partnership with Waukesha and the market opportunities this will bring."

About Manatron, Inc.: Manatron, a privately-held company and an investment of private equity firms Thoma Cressey Bravo, Inc. and Thoma Bravo, LLC, provides software and services for state and local governments to completely, fairly and efficiently assess real and personal property, and to bill and collect the related property taxes in their jurisdictions. Manatron's software manages the entire property life cycle, which includes deed recording, land records, GIS (Geographic Information System) integration, valuation, assessment administration, personal property, business licenses, cashing, tax billing and collection, delinquents and tax sales and e-government. Professional services consist of data conversions, installation, training, project management, hardware maintenance, forms processing and printing, consulting and appraisal services. Manatron is headquartered in Portage, Michigan and has offices throughout the United States. Manatron currently serves over 1,400 customers and manages approximately 30 million parcels.
